DETAILED ACTION

This is a response to the papers filed on 2/24/09. Claims 4-5, 7-12, and 19-25 are pending.

This application is in condition for allowance except for the following formal matters:

Claim Objections

Claims 4, 10, 11 and 20 are objected to because the claimed invention process is directed to non-statutory subject matter.

Claims 4, 10, 11 and 20 are non-statutory because a § 101 process claim must (1) be tied to another statutory class (a particular machine or apparatus) or (2) transform underlying subject matter (such as an article or materials) to a different state or thing; see In Re Bilski, 545 F.3d 943, 88 USPQ2d 1385 (Fed. Cir. 2008). If neither of these requirements are met by the claim, the method is not a patent eligible process under § 101.

A § 101 process claim that would not qualify as a statutory process would be a claim that recites purely mental step(s) that can be performed manually or merely manipulating an abstract idea without the use of a specific structure. Thus, to qualify as a § 101 statutory process, the claimed step(s) must explicitly recite the other statutory class, i.e., the computer, the thing, to which it is tied, for example by identifying the computer/ CAD system/EDA system that accomplishes the step(s) and providing transformation underlying subject matter to a different state or thing to provide meaningful, reasonable limits and a practical application.

Claims 4, 10, 11 and 20 recite a series of process steps for generating timing constraints but the steps neither explicitly recite a specific structure/machine that implement the claimed steps nor identify transformation of underlying subject matter to a different state or thing. Thus, the subject matter of claims 4, 10, 11 and 20 are non-statutory and not patent eligible.

Art Unit: 2825

In order to comply with the 35 USC § 101 statutory requirement, a limitation, i.e., "by using a computer" must be inserted in one of the claimed steps of each claim. This would be a tie and would overcome the 35 USC § 101 non-statutory issue.

Conclusion

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO**MONTHS from the mailing date of this letter

Any inquiry concerning this communication from the examiner should be directed to Paul Dinh whose telephone number is 571-272-1890. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Chiang can be reached on 571-272-7483. The fax number for the organization handling this application is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

/Paul Dinh/
